

Tattoo-A Latest And Stylish Fashion Trend

Tattoo is nothing but various kinds of designs and symbols that is permanently or temporary imprinted in the skin with the help of colourful ink and needles. It has now become very popular among people of every age group and it gives the cool and stylish appearance to human. Tattoo word is copied or derived from the word tatua which is Tahitian term and it means to mark. Tattoo is much popular among youth or college going teenager. There are no limited designs of tattoo; everyone can have his own choice of designs.

Let us know something about designs of tattoo

Flash is the name of [macchinette tattoo](#) design which consists of any kind of artwork from caricature or detailed sketched to letters or simple symbols. One or more than one colour can be composed in flash to make the design attractive. Almost all the tattoo parlours have variety of flash from which you can choose favourite with different ranges. However clients can bring their own choice of designs or they can tell the artist to make custom flash designs. At the time of design selection you should consult with the tattoo artist to find the suitable location and size on the body. Artist can also help you with the selection of colours of the final artwork. Before going for tattooing it is important to find the reputed tattoo parlour that must follow the APT (Association of Professional Tattooists) guidelines. APT has set some major guidelines for aghi per tatuaggi or tattoo parlour that must be followed.

- It is important for tattooists to tell the clients or new member to fill up the consent forms prior to starting the tattoo process.
- Immediately before or after the process it is necessary to wash client's hands and tattooists should wear latex gloves at the time of doing the process.

What Raw Materials and Equipment are used in making of tattoo?
